

21. The method of claim **20**, further comprising receiving one or more of a request for write access to the data storage device or a request for read access to the data storage device.

22. The method of claim **20**, wherein the case at least partially encloses the wireless device and is external to the wireless device.

23. The method of claim **20**, further comprising waking a controller of the case to enable the controller to receive the indication using a wired interface of the case, wherein the controller is woken by a smart power manager of the case.

24. The method of claim **23**, further comprising receiving a wakeup message from the wireless device using a wireless interface of the case, wherein the controller is woken by the smart power manager in response to receiving the wakeup message.

25. The method of claim **23**, further comprising detecting that a value of a timer satisfies a timer threshold, wherein the controller is woken in response to detecting that the value of the timer satisfies the timer threshold.

26. The method of claim **20**, further comprising:

receiving a second indication of a second charge level of the wireless device after charging the wireless device; and

disconnecting the voltage from the wireless device in response to determining that the second charge level of the wireless device exceeds a second charging threshold.

27. The method of claim **26**, further comprising receiving information from the wireless device, the information indicating one or more of the charging threshold or the second charging threshold.

28. The method of claim **27**, further comprising storing the information at the data storage device.

29. The method of claim **20**, wherein the case is removable from the wireless device.
